Dear Parents,

RE: STUDENTS REQUIRING MEDICATION

We are seeking your cooperation in maintaining the following procedures for the taking of medication by students at school. These procedures attempt to solve the ongoing problem of students forgetting to take medication, and also help the school maintain an accurate medical history for each student. Any student requiring medication at any time is required to follow these procedures:

Procedure for taking of Prescription medicines

Kindergarten to Year 8 Students

All prescription medicines are to be handed in at the office and clearly labeled with the student's name, class, dosage and other necessary details. The office will advise teachers when notice for medication is required to be taken. At 10.45am OR 12.45pm each day students will be asked to report to the office to take their medicine.

Parents are asked to adjust the medication times at home as much as possible so that the College is only involved in limited supervision of medication.

The office staff will supervise students while they take their medicine. The College cannot legally administer medicine; only supervise the student who must self-administer his or her medication. If a student refuses to take his or her medication then his or her parents will be notified immediately.

If your child requires medicine at other than the times noted above please contact the office. We will negotiate with parents regarding any special requirements.

Year 9 to 12 Students

All prescription medicines are to be handed in at the office clearly labeled with the student's name and class. Senior College students can collect their medication at the time(s) they are required to take it. The office staff will not normally supervise the students, unless prior special arrangements are made with the office.

If special arrangements are made for the office to supervise the student, parents are asked to follow the procedure mentioned above.

Non-prescription medicines (Panadol, Cough medicine etc.)

Students should follow the same applicable procedure listed above for prescription medication.

Special exemptions

Ventolin and other "puffer type" asthma medication should remain with the student. If parents wish to nominate other situations or medicines for exemption please contact the office.

Please complete the attached form and hand it to front office staff with the medication.
